Rio de Janeiro, June 14, 2021.

To the
Executive Board of
Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC

Dear Sirs:

We presented our independent audit report, contemplating the assessment of internal control over financial reporting and over regulatory compliance and other matters, in accordance with auditing standards generally accepted in the U.S.; with the financial audit guidelines contained in the Government Auditing Standards, issued by the United States Comptroller General, and the Office of Management and Budget (OMB).

We present the following:

1- Independent Audit Report on the financial statements at December 31, 2020;

2- Report on the internal control of financial reports and on the compliance with standards and other matters;

3- Memorandum of audit matters and observations;

4- Financial Statements at December 31, 2020.

At your entire disposal for any additional clarifications that might be necessary.

Yours faithfully,

WH Auditores Independentes

INDEPENDENT AUDIT REPORT

To the
Executive Board of
Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC

Report on the Financial Statements

We have audited the financial statements of Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC, which comprise the balance sheet as of December 31, 2020 and the respective statement of income, comprehensive income, changes in equity and cash flows for the year then ended, as well as the notes to the financial statements, including the summary of the significant accounting policies.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America (USA); this includes designing, implementing and maintaining internal controls relevant to the fair preparation and presentation of financial statements, free from material misstatement, whether by fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with generally accepted U.S. auditing standards and the financial auditing guidelines contained in the Government Auditing Standards, issued by the U.S. Comptroller General and the Office of Management and Budget (OMB). These standards require us to plan and perform the audit to obtain reasonable assurance that the financial statements are free from material misstatement, regardless caused whether by fraud or error.

In making the risk assessments, the auditor obtains understanding of internal controls relevant to planning the appropriate audit procedures under the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. Consequently, we have not expressed our opinion. Our audit includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion on the Financial Statements

In our opinion, except for the possible effects of the matter commented on in item "basis for qualified opinion", the aforementioned financial statements fairly present, in all material respects, the equity and financial position of **Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC,** as of December 31, 2020, the performance of its operations and cash flows for the year then ended, according to the accounting practices generally accepted in the USA.

Basis for Qualified Opinion

Linked projects to run

The accounts *"other credits - funds of closed projects" and "other payables - funds of closed projects",* according to notes 9 and 22, present, respectively, balances of R$ 12,013 thousand and R$ 39,137 thousand, transferred from the account of projects to run, mentioned in note 20. The analyses of the balances of these closed projects have not yet been completed. Possible adjustments to the Foundation's financial statements depend on the completion of these analyses.

Other Matters

Value Added Statement (VAS)

The Added Value Statement (VAS) for the year ended December 31, 2020, prepared under Management’s responsibility and presented as supplementary information, was submitted to the same audit procedures performed together with the audit of the financial statements. To form our opinion, we evaluated whether this statement is reconciled with the financial statements and accounting records, as applicable, and whether its form and content are in accordance with the criteria defined in Technical Pronouncement in force in Brazil. In our opinion, this statement of added value has been properly prepared, in all material respects, in accordance with the criteria defined in this Technical Pronouncement and is consistent with the financial statements taken as a whole.

Audit of the amounts corresponding to the previous year

The amounts corresponding to the year ended December 31, 2019, presented for comparison purposes as an integral part of attachment B, were audited by us, with a report dated February 28, 2020, highlighting the qualified opinion related to linked projects to run and the need of individual bank checking account per project.

REPORT ON THE INTERNAL CONTROL OF FINANCIAL REPORTS AND ON THE COMPLIANCE WITH STANDARDS AND OTHER MATTERS

BASED ON OUR AUDIT OF THE FINANCIAL STATEMENTS CARRIED OUT ACCORDING TO THE AUDIT STANDARDS OF THE U.S. GOVERNMENT

I- Internal control on financial reports

In planning and performing our audit of FIOTEC's financial statements, we rely on internal control over financial reporting (internal control) to determine the audit procedures that were appropriate in the circumstances, for the purpose of expressing an opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of internal control. Therefore, we have not expressed an opinion on the efficacy of the internal control of FIOTEC.

There is a deficiency in internal control when the design or operation of a control does not allow management or employees, in the normal course of performing their roles, to prevent or detect and correct misstatements in a timely manner. A material weakness is a deficiency or combination of deficiencies in internal control such that there is a possibility that a material misstatement in FIOTEC's financial statements will not be avoided, or detected and corrected in a timely manner. A significant deficiency is a deficiency or combination of deficiencies in internal control that is less severe than a material weakness, however, important enough to deserve the attention of those charged with governance.

Our audits of internal control were limited in purpose, as described in the first paragraph, and our procedures were not intended to identify all material or significant deficiencies that may exist in internal control.

This, in our audit, we have identified no deficiencies in internal control that we considered material. However, we identified some deficiencies in the internal control that we considered significant. They are as follows:

1- Deficiencies and weaknesses of information technology (IT) controls

- **Process of approval, payment, registration and construction of Projects Accounts**

  The Technology Environment has a system recognized in the market (SAP), but this system has not yet been configured for approvals with authority registered automatically, being made directly by the system, with automatic information reviews, which will strengthen controls, eliminate rework, information errors and unnecessary expenses.

Av. Almirante Barroso, nº 2 – 14º andar
Cep.: 20031-000
Rio de Janeiro - RJ - Brasil
Phone: (55-21) 2240-1332
E-mail: whrj@whac.com.br

- **Policies and procedures related to the operation of the IT area (Information Technology)**

  The lack of formalization of procedures concentrates the application of good IT security practices in the diligence of management and area coordinators.

  The security policy, training and security code documentation highlights the importance of procedures that the IT area must have, however, as informed by management, some procedures are not formalized, they are followed, as shown with system screens, according to standards, but there is no formalization and approval of important procedures, such as: a) Procedures for granting, changing and revoking logical access (Segregation of functions) - We did not identify a table with the summary of activities of positions that allows to check non-compliance detailed situations; b) Procedures for granting, altering and revoking logical access (Approvers of new users requested) - We have not identified formal procedures relating to granting, altering and revoking logical access.

- **Schedule for review and regularization for formal approval and review procedures**

  We identified that the work of reviewing the policies and procedures related to the IT area is informally approved and needs to be completed in accordance with the formatting of the standards determined by the quality management.

- **Current number of "super users"**

  We identified the existence of users with access to security systems, protocol and portal. There are currently 26 generic users to the production database, among others, which requires a review of the real need for the current number of "**super users**".

2- Formal controls on the scholarship holders' labor and on the evolution of research/projects

We found cases that, even when there is a forecast of working hours per scholarship holder in the contract signed with the financing agent (listed by name), formal controls of production and/or evolution of the research are not elaborated by the Project Coordinators.

The Scholarship Grant Agreement ("Termo de Concessão de Bolsa - TCB"), provides that the Project Coordinator is responsible for monitoring the activities, however, specific controls are not elaborated on hours, days or months of production of each scholarship holder of the project, but controls based on results and progress of production.

In spite of FIOTEC's Legal Counsel, according to Brazilian legislation, we must consider that, in the case of scholarship holders, the important thing is to deliver the activities within the schedule agreed with the project's coordinator, with the control of hours not being applicable, we understand that: as there is, in some cases, the contractual/budgetary forecast of working hours, it becomes necessary the formal controls that provide the allocation of time and evolution of activities in each project, or that, if possible, the future exclusion of these contractual provisions is promoted.

II- Compliance with laws, regulations, contracts and agreements with funders

As part of obtaining reasonable assurance that the financial statements are free from material misstatement, we conduct tests of compliance with certain provisions of laws, regulations, contracts and agreements with funders, the non-compliance of which could have a direct and material effect on the determination of amounts of the financial statements. However, issuing an opinion on compliance with these provisions was not the objective of our audit and, therefore, we do not express such an opinion.

Our test results did not reveal any instances of non-compliance or other matters that must be reported in accordance with U.S. Government Auditing Standards.

Management's responsibility

FIOTEC's managers are responsible for complying with the by-laws, regulations, terms and conditions of funds received from funders and for evaluating the effectiveness of internal control over financial reporting issued.

Auditors' responsibility

We are responsible for (1) obtaining a sufficient understanding of internal control over financial reporting to plan the audit and (2) testing for compliance with certain provisions of laws, regulations, contracts and agreements with funders.

Due to the inherent limitations of internal control, misstatements caused whether by error or fraud, losses or non-compliance may occur and go undetected. We also warn that projecting our audit results into future periods is subject to the risk that controls may become inadequate due to changes in conditions or degree of compliance. We further caution that our internal control tests may not be sufficient for other purposes.

We do not test compliance with all laws, regulations, contracts and agreements with funder, applicable to FIOTEC. We limit our testing to certain provisions of laws, regulations, contracts, agreements with lenders and breaches that may have a direct effect on determining the material amounts and disclosures in the financial statements. However, issuing an opinion on compliance with these provisions was not the objective of our audit and, therefore, we do not express such an opinion.

We emphasize that non-compliance may occur and not be detected in our tests and that these tests may not be sufficient for other purposes.

Management's response to the audit findings

Management's response to the matters identified and reported in our memorandum of matters is presented in Attachment A. We have not audited FIOTEC's responses and, therefore, have not expressed an opinion on them.

Objective of this report

The purpose of this report on internal control and compliance is solely to describe the scope of our internal control and compliance tests and the outcome of those tests, not to provide an opinion on the effectiveness of FIOTEC's internal control or on the failure to comply with laws, regulations, contracts, agreements with lenders, based on the U.S. Government Auditing guidelines. Thus, this report is not for any other purpose.

ATTACHMENT A

Rio de Janeiro, June 7, 2021

To the
Executive Board of
Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC

Dear Sirs:

We herein present our Memorandum of Matters and Observations, arising from the single audit services performed on the financial statements of Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC, for December 31, 2020.

We ask the company's Administration (management) to add their comments on for each matter mentioned in this memorandum, highlighting, when appropriate, their corrective action procedures and deadlines for implementation.

The highlighted matters, observations and recommendations were listed in this memo as follows:

1- Qualifications contained in the Independent Auditors' Report on the financial statements for 12/31/2020;

2- Reconciliation between controls, deficiencies, weaknesses or need to improve internal control.

We are at your entire disposal for further clarifications.

Yours faithfully,

WH Auditores Independentes
CRC-RJ 000319-O-8 – CNPJ 42.465.302/0001-85

GILSON MIGUEL DE BESSA MENEZES

E-mail: whrj@whac.com.br

MEMORANDUM OF MATTERS AND OBSERVATIONS - SINGLE AUDIT FOR 2020

1- Qualifications and emphasis contained in the Independent Auditors' Report on the financial statements for 12/31/2020

a) "Linked projects to run

The accounts *"other credits - funds of closed projects" and "other payables - funds of closed projects",* according to notes 9 and 22, present, respectively, balances of R$ 12,013 thousand and R$ 39,137 thousand, transfered from the account of projects to run, mentioned in note 20. The analyses of the balances of these closed projects have not yet been completed. Possible adjustments to the Foundation's financial statements depend on the completion of these analyses."

Recommendation:

Despite efforts, analyses of the balances of these projects were not completed in 2020.

Considering the relevance of the amounts and responsibilities involved, we recommend that efforts be made to conclude the analyses and define measures related to possible credits and debits not yet confirmed, and/or the need for accounting adjustments.

Management Response:

After the Foundation completed a careful analysis started in 2016, aiming to identify any inaccuracies in the operations recorded in several funds accounts of the projects to run, the Foundation concluded that it is not possible to recover some credits constituted in previous years, due to divergences determined in the execution internal controls. For this reason, in 2020, the Foundation accepted as losses the amount of R$ 5,850 thousand. The accounting analyses of the other projects have not yet been completed.

b) 'Checking account per project

The Foundation uses a single bank account for projects considered to be of smaller financial size, however, accounting standards emphasize the need to use a specific bank account for each project. Management intends to complete the work of migrating the balances of these projects to individual bank accounts by the end of 2021."

Recommendation:

We found that, in the previous year, measures were implemented so that all projects will have individual bank checking accounts, regardless of contractual value, aiming to improve FIOTEC's internal controls.

However, some projects of smaller financial size continue to have their resources handled in a single bank account.

We reiterate previous recommendations, so that efforts are made to open individual accounts for all projects, regardless of their values, in compliance with the accounting standards in force.

Management Response:

In 2020, the Foundation began actions so that all projects dating back January 2019 will have individual bank accounts. This process will be completed in 2021, for the few projects that are still in these conditions.

2- Reconciliation between controls, deficiencies, weaknesses or need to improve internal control.

2.1- Conciliation between controls

a) Labor provisions

From the comparison between the accounting balances of labor provisions, constituted on December 31, 2020, with the spreadsheets of provisions prepared by FIOTEC's HR department, we found the following differences, in R$ thousand:

DESCRITPION	ACCOUNTABILITY ON 12/31/2019	SPREADSHEET - HR	DIFFERENCE
Provision for Vacations	4,279	2,935	1,344
Prov. Termination (Teias/Tele saúde)	2,547	6,465	(3,918)
Provision - Termination	29,520	36,658	(7,138)
TOTAL	**36,346**	**46,058**	**(9,712)**

The lack of reconciliation or specific breakdown between the sources of information persisted throughout 2020. We got no explanations about the larger balances in the HR spreadsheets.

Recommendation:

Our tests concluded that the balances of accounting provisions were adequate. However, to strengthen internal controls, we reiterate our recommendations on the need for periodic reconciliation of account balances with the balances in HR spreadsheets. Our exams were tests based.

Management Response:

Management is taking steps so that labor provisions are generated and controlled by SAP. The Executive Board is seeking alternatives for external analysis to provide a diagnosis of these processes, with the expectation of finalizing it in 2021.

b) Negative balances of Projects

We identified that the VPAAPS - 009-FEX-20 project (in course) has a negative balance of BRL 1,658 thousand, on 12/31/2020, which may evidence a loan granted by FIOTEC or use of resources from other projects to maintain its goals.

Recommendation:

We reiterate the previous recommendation to implement the formalization of the accounting analyses of projects with negative balances, in comparison with information from the project sector, aiming at the prompt identification and solving of possible balances receivable.

Management Response:

As from 2021, the Foundation will undertake actions to maintain the analysis of the balances of these projects to be run, in order to evidence its reliable financial position always at the end of the year and, if there is a need for reclassification, it will be made.

2.2 – Deficiencies, weaknesses or need for Internal Control improvements

a) Manual of Institutional Internal Control Procedures

We note that FIOTEC has not yet formalized internal control procedures at the institutional level.

Although a manual of internal control procedures over projects, the main area of activities, has been prepared, there is still no need to formalize control procedures for FIOTEC as a whole, aiming to establish formal prevention mechanisms for the complete safeguarding and protection of its own assets and resources and against waste, loss, misuse, damage, unauthorized use or misappropriation.

Recommendation:

We recommend the broad formalization of internal control procedures, aiming to cover all areas of operational and administrative activities of the Foundation.

Management Response:

The Foundation will make its greatest efforts to develop the manual of institutional internal control procedures, aiming to define work routines and provide more safety, in the achievement of institutional objectives and goals, throughout 2021.

b) IT area (Information Technology)

We have reviewed the general controls of the IT department of FIOTEC. Our review was based on the request for information and documents relating to the operation of the IT area, in accordance with detailed work programs and the systems audit methodology of Walter Heuer Auditores Independentes, as well as interviews with the area manager, Mr. Evandro Gonçalves, for this understanding.

The details of these works and the assessed IT areas will constitute a separate report to be delivered to FIOTEC's management.

A summary of our considerations and identified points of attention is as follows:

- **Process of approval, payment, registration and construction of Projects Accounts**

  The Technology Environment has a system recognized in the market (SAP), but this system has not yet been configured for approvals with authority registered automatically, being made directly by the system, with automatic information reviews, which will strengthen controls, eliminate rework, information errors and unnecessary expenses.

- **Policies and procedures related to the operation of the IT area (Information Technology)**

  The lack of formalization of procedures concentrates the application of good IT security practices in the diligence of management and area coordinators.

  The security policy, training and security code documentation highlights the importance of procedures that the IT area must have, however, as informed by management, some procedures are not formalized, they are followed, as shown with system screens, according to standards, but there is no formalization and approval of important procedures, such as: a) Procedures for granting, changing and revoking logical access (Segregation of functions) - We did not identify a table with the summary of activities of positions that allows to check non-compliance detailed situations; b) Procedures for granting, altering and revoking logical access (Approvers of new users requested) - We have not identified formal procedures relating to granting, altering and revoking logical access.

- **Schedule for review and regularization for formal approval and review procedures**

  We identified that the work of reviewing the policies and procedures related to the IT area is informally approved and needs to be completed in accordance with the formatting of the standards determined by the quality management.

- **Current number of “super users”**

  We identified the existence of users with access to security systems, protocol and portal. There are currently 26 generic users to the production database, among others, which requires a review of the real need for the current number of “**super users**”.

Management response

FIOTEC's management understands that it still does not adopt satisfactory procedures to ensure the effectiveness of information technology controls, including those related to the segregation of roles and granting and monitoring access to its financial investment programs and data. Weaknesses have been minimized with the manual controls adopted and based on managers.

After a review was carried out, a Job and Roles Program was approved by the executive board of FIOTEC, in March 2021. This plan will support the project to implement new access profiles to the SAP system and the formalization of new review procedures and controls. The operating areas have already approved the project. The Security Committee must validate the plan at a meeting to be held in the first half of 2021.

Thus, significant deficiencies in the design and operational effectiveness of internal control over its financial investment programs and data are being addressed. As the efforts were directed towards the project to review jobs and salaries and change the SAP access profiles, after the implementation of this project, the other points listed in this report will also be addressed, according to the IT area.

c) Control of the labor of scholarship holders participating in the projects and evolution of the research / project - In comparison with the contracts

We found that for some projects, even when there is a forecast of working hours per scholarship holder in the contract signed with the financing agent (listed by name), formal controls of production and/or evolution of the research are not elaborated by the Project Coordinators.

The Scholarship Grant Agreement (“Termo de Concessão de Bolsa - TCB”), provides that the Project Coordinator is responsible for monitoring the activities, however, specific controls are not elaborated on hours, days or months of production of each scholarship holder of the project, but controls based on results and progress of production.

Av. Almirante Barroso, nº 2 – 14º andar
Cep.: 20031-000
Rio de Janeiro - RJ - Brasil
Phone: (55-21) 2240-1332
E-mail: whrj@whac.com.br

We were informed that, for some projects, the evolution of activities is informally presented to the funder (annually). Only at the end of the project is there a formal report of the achieved result.

According to the opinion of FIOTEC's Legal Counsel, according to the Brazilian legislation:

"There is no subordination in the case of scholarship holders, they are directly linked to the activities to be developed in the project, committing themselves to the proposed result and receiving guidance from the project's coordinator.

Thus, scholarship holders cannot be subject to schedule control, and must develop their activities in accordance with professional expertise compatible with the development of the project. This type of control only applies to types of contracts with subordination, such as those contracted under the CLT regime. ***In the case of the scholarship, it is important that the scholarship holder delivers the activities within the schedule agreed with the project's coordinator, with no time control being applicable."***

Despite the legal provision in Brazil, we suggest that it is studied the possibility of presenting work time allocation worksheets and the evolution of activities in each project, especially in projects linked to contracts in which such budget forecasts are formalized, or that the possibility of exclusion of this contractual provision is reviewed.

Management Response:

Considering that this demand directly involves the projects negotiated with Fiocruz, the Foundation understands that this is an area to be studied and will work with its supported Foundation for a way to generate a control of hours spreadsheet for those involved in the managed projects or the review of the possibility of exclusion of these contractual provisions.

d) Compilation of information and financial balances for projects financed with U.S. federal resources.

We warn to the need for periodic preparation of accurate financial information on projects financed with U.S. federal funds, such as: balances at the beginning of the period, inflows of funds, disbursements made and balances at the end of the period, including this information in a note to the financial statements to be sent to the American funders, whenever work of this nature is requested (single audit).

Management Response:

For 2021, the information will be timely and completely elaborated.

INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS

To
Directors of
Fundação para o Desenvolvimento Científico e Tecnológico em Saúde – FIOTEC

Qualified Opinion

We have audited the financial statements of **Fundação para o Desenvolvimento Científico e Tecnológico em Saúde - FIOTEC**, which are comprised of the statement of financial position as of December 31, 2020 and the income statements, comprehensive income, changes in equity and cash flows for the year ended on that date, as well as the corresponding explanatory notes, including a summary of the main accounting practices.

In our opinion, except for the possible effects of the subject matter described in the topic “basis for a qualified opinion”, the accounting statements referred to above present fairly, in all material respects, the financial position of **Fundação para o Desenvolvimento Científico e Tecnológico em Saúde - FIOTEC** as of December 31, 2020, the performance of its operations and its cash flows for the year ended on this date, in accordance with accounting practices adopted in Brazil.

Basis for a qualified opinion

Linked projects to be performed

The accounts *"other credits - resources from closed projects", and "other obligations - resources from closed projects",* according to notes 9 and 22, present, respectively, balances of R$ 12,013,000, and R$ 39,137,000, transferred from the projects to be executed account, mentioned in note 20. The analysis of the balances of such closed projects has not yet been completed. Possible adjustments to be made to the Foundation's financial statements depend on the completion of these analysis.

Our audit was conducted in accordance with Brazilian and international auditing standards. Our responsibilities, in accordance with these standards, are described in the following section entitled "Auditor's responsibility for auditing the financial statements". We are independent in relation to **Fundação para o Desenvolvimento Científico e Tecnológico em Saúde - FIOTEC,** in accordance with the relevant ethical principles set out in the Accountant's Professional Code of Ethics and in the professional standards issued by the Federal Accounting Council, and we comply with other ethical responsibilities according to standards. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

Av. Almirante Barroso, nº 2 – 14º andar

Email: whrj@whac.com.br

Emphasis

Bank checking account by project

According to note 20, the Foundation uses a single bank account for projects considered to be of lesser financial size, however, the accounting rules emphasize the need to use a specific bank account for each project. FIOTEC's management intends to complete the work of migrating the balances of these projects to individual bank accounts by the end of 2021.

Other matters

Statement of Value Added (DVA)

The Statement of Value Added (DVA) for the year ended December 31, 2020, prepared under the responsibility of Management and presented as supplementary information, was submitted to the same audit procedures performed in conjunction with the audit of the financial statements. To form our opinion, we assessed whether this statement is reconciled with the financial statements and accounting records, as applicable, and whether its form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 - "Statement of Value Added". In our opinion, this statement of added value was properly prepared, in all material respects, according to the criteria defined in this Technical Pronouncement and is consistent with the financial statements taken as a whole.

Project management

The audit procedures we applied on the balances involving projects managed by the Foundation, did not aim to evaluate management aspects, such as: budgets, deadlines, achievement of objectives and accountability. They were carried out with the objective of evaluating the internal accounting controls exercised on receipts, payments, administration fees and movement of bank current accounts of the projects.

Audit of amounts corresponding to the previous year

The amounts corresponding to the year ended on December 31, 2019, presented for comparison purposes, were audited by us, with a report dated February 2020, highlighting the reservations related to linked projects to be performed and the need for an individual bank current account per project, and an emphasis on working capital deficiency and provisions for contingencies.

Av. Almirante Barroso, nº 2 – 14º andar

Other information accompanying the financial statements and auditor's report

FIOTEC's Management is responsible for such other information that comprises the Management Report (Activities Reports).

As of the date of issue of this Audit Report, the Management Report has not been presented to us.

Our opinion on the financial statements does not and would not take into account the aforementioned Management Report.

However, in connection with the audit of the financial statements, our responsibility is to read the Management Report and, in doing so, consider whether that report is materially inconsistent with the financial statements or with our knowledge obtained from the audit, or otherwise, it appears to be materially distorted. If, based on the work performed, we conclude that there is a material misstatement in the Management Report, we are required to report this fact. As the Management Report was not presented to us, despite being requested, there is nothing to comment on.

Management and governance's responsibility for the financial statements

Management is responsible for the preparation and proper financial statements presentation in accordance with the accounting practices adopted in Brazil, and for the internal controls it has determined necessary to allow the financial statements preparation free of material distortion, regardless of whether caused by fraud or error.

In the financial statements preparation, management is responsible for evaluating the entity's ability to continue operating, disclosing, where applicable, matters related to its operational continuity and this accounting base use in the financial statements preparation unless management intends to liquidate the entity or cease its operations, or has no realistic alternative to avoid the operations closure.

Those responsible for the entity's governance are those responsible for supervising the preparing the financial statements process.

Auditor's responsibility for auditing the financial statements

Our objectives are to obtain reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether due to fraud or error, and to issue an audit report containing our opinion. Reasonable security is a high level of security, but not a guarantee that the audit carried out in accordance with Brazilian and international auditing standards always detects relevant existing distortions. The distortions can be due to fraud or error and are considered relevant when, individually or jointly, they can influence, within a reasonable perspective, the economic decisions of users made based on said financial statements.

Av. Almirante Barroso, nº 2 – 14º andar

Rio de Janeiro - RJ - Brazil
Phone: (55-21) 2240-1332
Email: whrj@whac.com.br

As part of an audit conducted in accordance with Brazilian and international auditing standards, we exercise professional judgment, and maintain professional skepticism throughout the audit. Furthermore:

- We identify and assess the risks of material misstatement in the financial statements, whether due to fraud or error, plan and perform audit procedures in response to such risks, and obtain sufficient and appropriate audit evidence to support our opinion. The risk of not detecting material misstatement resulting from fraud is greater than that arising from error, since fraud may involve circumventing internal controls, collusion, forgery, omission or intentional misrepresentation.

- We obtained the understanding of relevant internal controls for the audit to plan for the appropriate audit procedures to the circumstances, but not with the purpose of giving an opinion on the effectiveness of the entity's internal controls.

- We evaluated the appropriateness of accounting principles used and the reasonableness of accounting estimates and respective disclosures made by management.

- We concluded on the adequacy of the use, by management, of the accounting basis for operational continuity and, based on the audit evidence obtained, whether there is significant uncertainty in relation to events or circumstances that may cause significant doubt in relation to the entity's ability to continue operating. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the entity to no longer remain in business continuity.

- We evaluate the general presentation, structure and content of the financial statements, including the disclosures and whether the financial statements represent the corresponding transactions and events in a manner consistent with the purpose of proper presentation.

Av. Almirante Barroso, nº 2 – 14º andar

We communicate with those charged with governance regarding, among other things, the planned scope, timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identified during our work.

1 Operating context

Fundação para o Desenvolvimento Cientifico e Tecnológico em Saúde (Fiotec), is located at Av. Brasil No. 4036, in Manguinhos, Rio de Janeiro, enrolled with CNPJ-MF No. 02.385.669/0001-74, has State Registration No. 77.469.770, Municipal Registration No. 242.022-8, is a non-profit legal entity governed by private law, registered with the RCPJ - Civil Register of Legal Entities.

To act as a support foundation, Fiotec is duly registered and accredited by the Ministry of Education (MEC) and the Ministry of Science, Technology and Innovation (MCTI). The institution also has the title of Declaration of Public Utility of the Government of the State of Rio de Janeiro and the title of Social Organization (OS) by the Government of the City of Rio de Janeiro. According to Law 8,010/90, Fiotec is authorized, by the National Council for Scientific and Technological Development (CNPq), to import goods for scientific and technological research.

From 2014 to 2016 (financial years of 2013 to 2015), the institution was awarded a Citizen Company certificate by the Regional Accounting Council (CRC-RJ), in partnership with the Federation of Industries of the State of Rio de Janeiro (Firjan) and the Federation of Commerce of the State of Rio de Janeiro (Fecomércio). Fiotec is certified by the D&B group, which is a major credit risk analysis and financial assessment companies in the United States of America (USA) and has DUNS Number (Data Universal Numbering System). The number is internationally recognized as a common identifier of companies for EDI (Electronic Data Interchange) and international trade transactions. It is only possible to register in the SAM (System for Award Management) when holding this number, which governs all contracts executed with US federal agencies.

On September 20, 2019, the sentence handed down on January 24, 2019 was final and unappealable, considering the request to declare Fiotec as an immune entity, as provided for in article 195, paragraph 7 of CF/88, in view of the fulfillment of requirements of art. 14 of the CTN.

Fiotec is responsible for the financial management and accountability for the expenses of the United Against Covid-19 program launched on April 2, 2020 by Oswaldo Cruz Foundation (Fiocruz), which is supported by the public and private spheres, to face the new coronavirus pandemic. In 2020, the fund had reached approximately R$ 421,000,000.00 in donations made by 690 individuals and 76 other institutions around the world. At the same time, in 2020, the program financed projects in 41 different work plans, divided into the areas of production of diagnostic kits; assistance to patients; medication production; staff training; community mobilization and support; reliable communication; research applied on solutions for understanding Covid-19; and internalization of technology and production of a vaccine. The funds obtained through the United Against Covid-19 program also financed a study that evaluated the effectiveness of four different treatments against coronavirus infection. The Solidarity clinical trial was developed by the World Health Organization (WHO) and coordinated here in Brazil by Fiocruz.

The institution also managed the funds of the partnership between Fiocruz and Fundação Itaú para Educação e Cultura, which made it possible to install two analytical centers, one in Manguinhos, in Rio de Janeiro, and another at Centro Industrial de Saúde do Eusébio, in Ceará. Donations transferred by Todos pela Saúde initiative, linked to Fundação Itaú, were invested in 15,000 daily diagnostic tests at the center in Rio de Janeiro, and another 10,000 tests at the laboratory in Fortaleza.

Fiotec also acted, and continues to act, in the acquisition of hospital equipment and supplies used to care for patients at the Covid-19 Pandemic Hospital Center of Evandro Chagas National Infectiology Institute (INI/Fiocruz). The selection process for hiring health professionals who currently work at the hospital was also administered by the institution, with the receipt of thousands of CVs from workers from different areas and backgrounds.

Including all the flights chartered by Fiotec to import Personal Protective Equipment (PPE), pharmaceutical materials, supplies and respirators. In 2020 the institution had invested about R$41,500,000.00. The operations took place throughout the past year to supply the Covid-19 Pandemic Hospital Center and the Analytical Centers of Rio de Janeiro and Ceará.

- Mission

  To participate in scientific, technological and innovation development in health, through the shared management of programs and projects, for the quality of life of society.

- Vision

  To be recognized by 2021 by the coordinators as a benchmark institution in program and project management, by using the best governance practices, and to be a source of pride for our employees.

- Values

  - We respect life, human dignity and the environment;
  - We value people and encourage proactivity;
  - We encourage an integrated, participatory, collaborative and innovative environment;
  - We believe in the strength of our work to carry out our actions with excellence;
  - We act in an ethical and transparent manner in organizational processes;
  - Our institutional relationship is based on respect for diversity, trust, cordiality and responsible attitude.

- Operation

  Fiotec acts in the logistical, administrative and financial management support of projects exclusively from Fiocruz, in fields as varied as health, in the areas of Research, Teaching and Extension, Stimulating Innovation, Scientific and Technological Development and Institutional Development.

  The relationship between Fiocruz and Fiotec is regulated by the third Covenant executed between the institutions (No. 185/2016). Through the document, it is determined that the development of the projects and programs must be in line with the institutional mission of Fiotec and previously approved by Fiocruz. Fiotec, with transparency and a qualified team, dedicates itself day by day to provide service with the required efficiency for customized project management.

- Administrative structure

a) Board of Trustees

Fiotec’s superior resolution and guidance body. The members are appointed by the president of Fiocruz and mandatorily endorsed by its Advisory Board. It is the responsibility of this body to approve and appoint the members of the Executive Board.

b) Audit Committee

Fiotec's economic and financial management oversight body. Annually, it submits to the Board of Trustees the annual report, the annual balance sheet and other financial statements, as duly audited. In 2012 it began to evaluate the balance sheet quarterly. Its members are also appointed by the President and endorsed by Fiocruz's Deliberative Council.

c) Executive Board

The members of the Executive Board are appointed by the Board of Trustees and approved by the Deliberative Board of Fiocruz. It is responsible for guiding and monitoring the administrative and financial activities of Fiotec, the strategic development of the institution with the implementation of new political and administrative actions and to mediate the relationship between Fiotec and Fiocruz.

- Operating structure

Fiotec, committed to providing high quality service, ended December 31, 2020 with two hundred and ninety-one (291) employees hired under the rules of the Consolidation of Labor Laws (CLT), 23 (twenty-three) apprentices, in a total of three hundred and fourteen (314) employees distributed at the headquarters. In addition, Fiotec has two thousand one hundred ninety-nine (2,199) employees hired under the rules of the Consolidation of Labor Laws (CLT) and two (02) trainees who work directly in the Fiocruz projects.

- Organizational structure

The organizational structure is divided into seven managements and two advisory services:

a. Legal Advisory Service

Area responsible for legal advice, opinions and interpretation of laws, analysis of contracts, civil and labor doubt.

b. Press Office

Area whose duties are the dissemination of information and structuring of actions to disseminate Fiotec to the internal and external public; updating internal and external communication tools; assistance and production of various institutional contents.

c. Project Management

Area responsible for project management in all phases and mediation between the project coordination, the other areas of Fiotec and the financing agents.

d. Social Health Organization

Area whose responsibilities are the execution, physical and financial monitoring and accountability of the projects that make up the Management Contract, according to the rules of execution of the financing agent and the current policies. Detailed presentation of all financial execution and results of indicators and targets established in the Management Contract.

e. People Management

It is responsible for the organization, planning and performance of all works and activities related to the strategic management of people, labor routines and worker's health, both within the headquarters of Fiotec and the professionals assigned to the projects.

f. Quality Management

To control and guarantee the quality in the processes and services provided by the Fiotec's team; perform warranty activities and support the Quality Management System and the area; record keeping and continuous improvement; administrative support activities; mapping, revisions, improvements and support in processes; dissemination, communication and availability of manuals of procedures and processes. The implementation and monitoring of institutional transparency actions and revalidation of the degrees and certifications required for the operation of Fiotec.

g. Logistics Management

Logistics has as some of the responsibilities: the management of purchasing activities and contracting of national and international services, monitoring of purchases, item and supplier records, contract management, bidding processes, social services, and archives.

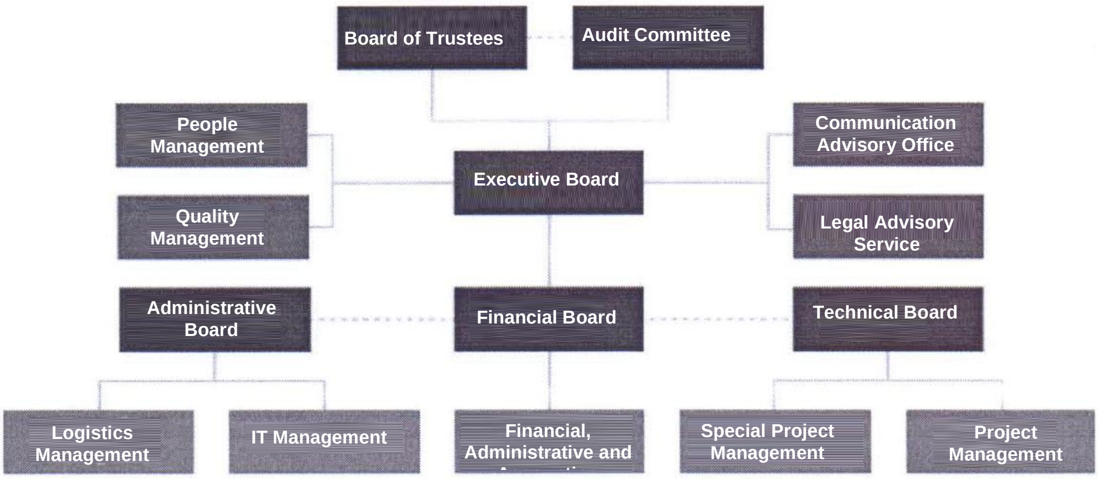
h. Financial, Administrative and Accounting Management

As the area holds all the financial and accounting information of the organization, it is the responsibility of the Controller to identify, plan, organize, control and manage all risks and costs.

i. Information Technology Management

It is responsible for the administration of information-related assets and services.

Organizational chart



2 Basis for preparation

a. Statement of compliance

The financial statements were prepared in accordance with the accounting practices adopted in Brazil, based on the provisions contained in ITG 2002 – Non-profit Entities and also by NBC TG 1000 – Accounting for small and medium enterprises for aspects not addressed by ITG 2002 – Non-profit Entities.

The issuance of the financial statements was approved by the financial administrative board on March 25, 2021.

b. Basis for measurement

The financial statements were prepared based on historical cost as a basis of value, except for non-derivative financial instruments designated at fair value through profit or loss, measured at fair value.

c. Functional currency and reporting currency

The financial statements are presented in Reais, which is the functional currency and the reporting currency of the Foundation.

d. Use of estimates and judgments

The preparation of the financial statements in accordance with accounting practices adopted in Brazil requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ from these estimates.

Estimates and assumptions are reviewed in a continuous manner. Revisions to accounting estimates are recognized in the period in which the estimates are reviewed and in any future periods affected.

The information on critical judgments regarding the adopted accounting policies that have effects on the amounts recognized in the financial statements are included in the following notes:

- Note No. 3d (ii) – Life span of fixed assets
- Notes No. 3e

3 Main accounting policies

The accounting policies described in detail below have been consistently applied to all periods presented in these financial statements.

a. Foreign currency

Transactions in foreign currency, which for purposes of these financial statements are those that are not realized in local currency (Reais), are converted at the exchange rate of the dates of each transaction.

Monetary assets and liabilities denominated in foreign currency are converted to Reais at the exchange rate of the closing date. Gains and losses on changes in exchange rates on monetary assets and liabilities are recognized in the income statement. Non-monetary assets and liabilities acquired or contracted in foreign currency are converted based on the exchange rates of the transaction dates.

b. Financial instruments

(i) *Non-derivative financial assets*

The Foundation recognizes receivables and deposits initially as of the date on which they were created. All other financial assets and liabilities are initially recognized on the trade date at which the Foundation becomes a party to the contractual provisions of the instrument.

The Foundation has its non-derivative financial assets and liabilities recorded at fair value through profit or loss

Financial assets recorded at fair value through profit or loss A financial asset is classified at fair value through profit or loss if it is designated as held for trading and designated as such upon initial recognition. Financial assets are designated at fair value through profit or loss if the Foundation manages such investments and makes purchase and sale decisions based on their fair values in accordance with the Foundation's documented risk management and investment strategy. Transaction costs, after initial recognition, are recognized in profit or loss as incurred. Financial assets recorded at fair value through profit or loss are measured at fair value, and changes in the fair value of these assets are recognized in the income statement.

Loans and Receivables
The loans and receivables are financial assets with fixed or determinable payments which are not quoted in an active market. These assets are initially recognized at fair value plus any attributable transaction costs.

After initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment loss.

Loans and receivables include trade accounts receivable, other receivables and loans granted.

Project-related resources
The resources linked to projects include balances of cash in bank account with restriction and restricted financial investments.

Non-derivative financial liabilities
Financial liabilities are initially recognized on the trade date at which the Foundation becomes a party to the contractual provisions of the instrument. The Foundation writes off a financial liability when its contractual obligations are withdrawn, canceled or expired.

The foundation has the following non-derivative financial liabilities: suppliers, loans and financing.

These financial liabilities are initially recognized at fair value plus any attributable transaction costs. After initial recognition, these financial liabilities are measured at amortized cost using the effective interest method.

(ii) *Derivative financial instruments*

There were no transactions with derivatives during the years of December 31, 2020 and 2019, including hedge operations.

c. Accounts receivable

They are given at present realizable value. The allowance for doubtful accounts is recognized based on the analysis of the risks of realization of accounts receivable, when Management deems it necessary.

The management of the Foundation, based on the composition of amounts receivable, recorded allowance for doubtful accounts, considering the effective losses of the last twelve months. The effects on the amounts recognized in the financial statements are included in the following notes:

- Note 6 - Accounts receivable from customers

d. Property, plant and equipment

(i) Recognition and measurement

Items of fixed assets are measured at historical cost of acquisition or construction, less accumulated depreciation and accumulated impairment losses, when necessary.

(ii) Depreciation
Depreciation is calculated on the depreciable value, which is the cost of an asset, or other substituted value for cost, less the residual value.

The depreciation recognized in profit or loss is based on the straight-line method over the estimated life spans of each part of an item of fixed assets.

The estimated life spans for the current and comparative periods are as follows:

Buildings	25years

Machinery and equipment	10 years
Furniture and utensils	10years
Vehicles	5years
Computer - Hardware	5years

Depreciation methods, life spans and residual values will be reviewed at each financial year-end and any adjustments are recognized as changes in accounting estimates.

e. *Intangible*

Intangible assets acquired separately are measured in the initial recognition at acquisition cost and subsequently deducted from accumulated amortization and impairment losses when applicable.
The estimated life span for the current and comparative period is 5 years.

f. *Projects*

The inflows and outflows of resources used for the performance of the projects are recorded in individual accounts of assets and liabilities, and there is no consequence in the statement of the ***Foundation's surplus/deficit. Financial revenues from financial investments*** and financial expenses from bank fees for restricted accounts are recorded in liabilities, in a specific account.

g. *Determination of income and recognition of income and expenses of Projects*

The recognition of income and expenses is carried out in accordance with the accrual basis of accounting. The amounts received and employees from Project contracts are recorded as follows:

- **Receipt of resources:** When the resources are received, the debit of resources linked to projects and the credit of linked projects to be performed are recognized in current liabilities.

- **Consumption as expenses:** When there are expenses in the Projects, the corresponding expenses are recognized, and the expenses are recognized against the debit within the liabilities of projects to be performed.

h. *Impairment*

Financial assets

A financial asset not measured at fair value through profit or loss is valued at each reporting date to determine whether there is objective evidence that there has been an impairment loss. An asset has an impairment loss if objective evidence indicates that a loss event occurred after the initial recognition of the asset and that loss event had a negative effect on projected future cash flows that can be reliably estimated.

The Foundation's management has not identified any evidence to justify the need for a provision

i. *Provisions and current liabilities and non-current liabilities*

A provision is recognized in the balance sheet when the Foundation has a legal or constituted obligation as a result of a past event, and an economic resource will likely be required to settle the obligation. Provisions are recorded based on the best estimates of the risk involved.

Current liabilities and non-current liabilities are recorded at known or estimated amounts, plus, when applicable, the related charges, monetary variations incurred up to the balance sheet date.

(In thousands of Reais)

j. *Other current assets and non-current assets*

They are recorded at known or estimated amounts, plus, when applicable, the related charges, monetary variations incurred up to the balance sheet date.

k. *Determination of income and recognition of income and expenses*

The recognition of income and expenses is carried out in accordance with the accrual basis of accounting.

l. *Financial revenues and expenses*

Financial revenues basically include interest income on financial investments.

Financial expenses basically include bank fees charged by financial institutions.

m. *Income from voluntary work*

As established in the ITG 2002 Interpretation (R1) - Non-Profit Entity, the Foundation values revenues from voluntary work, including members of management bodies, being measured at their fair value taking into account the amounts that the Foundation would pay if they contracted these services in a similar market. As established in ITG2002 (R1) – Non-Profit Entities, the Foundation values revenues from voluntary work, including by members of the management bodies. Revenues from voluntary work are recognized in the result for the year as revenue in the operating revenues group against operating expenses.

n. *Financial risk management*

The Foundation presents exposure to the following risks arising from the use of financial instruments:

- Liquidity Risk
- Market Risk

The foundation provides information on the exposure of each of the aforementioned risks, the Foundation's objectives, policies and processes for maintenance and risk management in Note 32.

Structure of risk management

The Foundation's risk management policies are established to identify and analyze the risks dealt with when setting limits. Risk management policies and systems are reviewed to reflect changes in market conditions and in the Foundation's activities.

4 Determination of fair value

Several policies and disclosures of the Foundation require the determination of fair value for both financial and non-financial assets and liabilities. The fair values have been determined for measurement and/or disclosure purposes based on the methods presented in Note 32. When applicable, additional information on the assumptions used in the calculation of fair values is disclosed in the specific notes for that asset or liability.

i. Restricted resources refer to resources received by the Foundation that will be used exclusively in projects mentioned in note 20.

ii. On December 31, 2020, financial investments refer to savings and investment funds of Banco do Brasil, Santander, Bradesco and BEM DTVM, remunerated between 7.14% and 271.41% of the CDI Interbank Deposit Certificate (57% to 126% as of December 31, 2019).

6 Accounts receivable from clients

The balance of accounts receivable refers mainly to the invoicing made by the Foundation to financing agents of the projects and their portion retained to cover the operating cost.

8 Loans to employees

The balance of advance to employees in the amount of R$662 refers mainly to advances of vacations and wages.

	12/31/2020	12/31/2019
Loans to employees - Projects	662	581
Loans to employees - Fiotec	-	81
	662	662

9 Other credits

The balance of other credits refers mainly to finalized projects and remains under analysis by the Foundation, as shown in the table below.

Current assets	**12/31/2020**	**12/31/2019**
Deposit in court to recover PROJECTS (inss/pis) credits (i)	-	39,474
Deposit in court to recover FIOTEC (inss/pis) credits (i)	-	7,655
Other credits (ii)	3,092	430
Non-current assets	3,092	47,559
Recoverable taxes (i)	574	574
Resources of completed projects (iii)	12,013	5,449
Other credits (iv)	-	5,850
	12,587	11,873
Total	15,679	59,432

- **i.** The balance is represented by the recoverable deposits in court, released in court on July 21, 2020, related to the case that the Foundation fulfilled, cumulatively, the requirements established in article 14, items I, II and III, CTN, which is why FIOTEC's right to the immunity provided for in article 195, paragraph 7, of the Constitution is recognized.
- **ii.** The balance mostly represents expenses with COVID-19.
- **iii.** As of December 31, 2020, the Foundation has the following linked projects to be performed (projects in progress) in the closing phase and included in note 20;

(In thousands of Reais)

Others	1
	Total 12,013

iv. The balance is represented by the projects to be performed (ongoing projects) that the Foundation recognized as losses, after analyzing the balances of these projects, concluding that the recovery of the constituted credits is not possible. Considering that the amount of R$ 5,850,000 in 2016 was constituted by the projects completed in previous years, whose divergences found in the internal controls of their performance, prevented the recovery of this amount by the Foundation.

10 Loans granted

They are carried out with the Foundation's own resources to Fiocruz Projects, aiming at full compliance with its statutory mission, as well as the preservation of the public interest so that the projects do not suffer interruption, there are no aging list or adjustment for inflation. On 12/31/2020 the balance of loans granted is R$ 16,794 (R$ 13,209) in 2019.

	01/01/2020	**Loans**	**Payments**	**12/31/2020**

11 Deposits in court

The Foundation is a party to lawsuits before courts and government agencies, arising from the ordinary course of operations, involving tax, labor and civil matters.

	12/31/2020	12/31/2019
Labor	412	278
Civil (i)	5,896	5,896
Total	6,308	6,174

i. The main civil causes derive from the discrepancy in the accountability of the projects: Bonsucesso General Hospital and Brazilian National Health Surveillance Agency.

12 Property, plant and equipment

In 2016, the Oswaldo Cruz Foundation issued a letter of consent for the use of the area of 1,600m2, part of the property located at Avenida Brasil, No. 4,036 - Expansion of Fiocruz - Manguinhos Campus, Rio de Janeiro - RJ, which is an area destined for the facilities of modular structures of the Foundation for Scientific Health Development - FIOTEC (Fundação para Desenvolvimento Cientifico em Saúde).

This property is in the process of regularization with the Patrimonial Office of the Union (SPU/RJ), with change of destination at the request of Fiocruz, Assignment of Use Without Consideration, for Full Donation concurrently with regularizations of enrollment with the Municipal Government of Rio de Janeiro and RGI.

(In thousands of Reais)

This provisional authorization document is commonly used by SPU in cases of temporary impossibility of the destination process, and it is not necessary to execute the respective Contract of assignment of use, which will be performed as soon as the donation of the concerned property is consummated.

The composition of fixed assets is demonstrated below:

(In thousands of Reais)

Right to use Software and Assignment of Rights are assets with determined life span in five years, during which they must be fully amortized.

14 Suppliers

The Foundation has a financial risk management policy to ensure that accounts payable are settled on time.

The Group's exposure to liquidity risks related to accounts payable to suppliers and other Payables account is disclosed in note 32.

The amount refers mainly to Projects managed by the Foundation that are pending definition for due settlement or write-off.

	12/31/2020	12/31/2019
National suppliers - Projects	3,409	2,660
Individual suppliers - Projects	7,912	5,204
Foreign suppliers - Projects	4,055	1,417
Suppliers Projects	**15,376**	**9,281**
Domestic suppliers - Fiotec	128	314
Individual suppliers - Fiotec	9	7
Fiotec Suppliers	**137**	**3 21**
Total	**15,513**	**9,602**

15 Liabilities

The amount is represented by the obligations to be returned to the projects in progress. Due to the judgement/appellate decision becoming final and unappeallable, the immunity provided for in article 195, paragraph 7, of the Constitution is recognized.

	12/31/2020	12/31/2019
Attorney's fees payable FIOTEC (i)	139	2,029
Attorney's fees payable PROJECT	528	7,713
	667	9,742
Deposit in court (inss/pis) to be reimbursed PROJECT (ii)	35,304	31,576
	35,304	31,576
Provision (ins/pis) to be reimbursed - PROJECT (iii)	1,261	1,261
Total	37,232	42,579

i. Attorney's fees of 20%;
ii. Amount deposited in court as mentioned in note 9 (i)
iii. Provision made in 2019.

16 Social and labor obligations

The balance is represented by social and labor obligations, as follows:

(In thousands of Reais)

	12/31/2020	12/31/2019
Wages payable - Projects	9,522	3,435
Provisions of vacation and vacation charges - Projects	1,999	1,189
INSS payable - Projects	992	630
FGTS payable - Projects	1,291	541
INSS payable - Projects	86	109
Total Projects	**13,890**	**5,904**
Wages payable - Fiotec	41	696
Provisions of vacation and vacation charges - Fiotec	1,790	1,669
INSS payable - Fiotec	109	174
FGTS payable - Fiotec	167	118
Other payable - Fiotec	41	30
Total Fiotec	**2,148**	**2,687**
Total	**16,038**	**8,591**

17 Tax obligations

The balance is represented by Taxes and Contributions Payable, as follows:

	12/31/2020	12/31/2019
ISS payable	4,639	603
ISS withheld from third parties payable	79	4
ICMS payable	1,022	170
ISS payable	3	-
IRRF of third parties payable	425	84
1RRF of wages payable	2,285	1,193
INSS withheld from legal entity	155	12
INSS reread of individual	285	49
Third-party CSRF (PIS, COFINS and CSLL)	405	83
Total	**9,298**	**2,198**

18 Installments and financing

The balance is represented by installments and financing, as follows:

Current liabilities	12/31/2020	12/31/2019
Financing (i)	-	133
Short-term financing charges	-	(6)
Installment of contractual fines (ii)	135	131
Non-current liabilities	135	258
Installment of contractual fines (ii)	898	1,008
	898	1,008
Total	1,033	1,266

(In thousands of Reais)

i. It refers to the acquisition of one hundred and seventy-six (176) swivel chairs with financing by BNDES, paid in 10 installments of R$ 17.

ii. Refers to the fine imposed by the Secretary of State for Health in the amount of R$ 1,000, due to the contract inspector's finding irregularities in the execution of contract No. 002/2010, which has as its object the provision of planning and execution services. management of medical care in the emergency units of hospitals and in the fixed pre-hospital emergency units of the Health Department - SES/RJ.

On September 24, 2018, a request for special installments was made, at the Attorney General's Office of the State of Rio de Janeiro, through the administrative process No. E-08/6257/2009, to be paid in 120 months. There are still ninety-two (92) installments to be paid, totaling R$ 1,033.

19 Provisions for contingencies

The Foundation, in the ordinary course of its operations, is subject to lawsuits of tax, labor and civil nature. The Management, based on the opinion of its legal advisors and, when applicable, based on specific opinions issued by experts on the same date, evaluates the expectation of the outcome of the lawsuits in progress and determines whether or not to establish a provision for contingencies.

As of December 31, 2020 and December 31, 2019, the Foundation had the following pending lawsuits of labor and tax nature.

	12/31/2020	12/31/2019
Current liabilities		
Lawsuit - Injunction - ISS(ii)	-	18,574
Lawsuit - Injunction - ICMS (ii)	-	14,361
	-	32,935
Non-current liabilities		
Lawsuit - Injunction - ISS(ii)	33,112	-
Lawsuit - Injunction - ICMS (ii)	21,194	-
Labor Lawsuits	4,591	3,462
	58,897	3,462
Total	58,897	36,397

On September 20, 2019, the sentence handed down on January 24, 2019 was final and unappealable, considering the request to declare FIOTEC as an immune entity, as provided for in article 195, paragraph 7 of CF/88, in view of the fulfillment of requirements of art. 14 of the CTN.

This court decision made evident the need for a review by the Foundation of the respective presentation or more appropriate classification of the amounts provisioned. Proceeding in reclassification of current liabilities to non-current liabilities of the amounts provisioned in lawsuits (i) and (ii), which totaled on September 30, 2020 the amount of R$ 47,428 (R$ 32,935 in 2019), whose settlement is not foreseen for the period of up to twelve months after the balance sheet date and that should be considered as non-current liabilities.

(i) The provision arises from an injunction obtained in case no. 0401177-14.2009.8.19.0001 in declaratory action to recognize the inexistence of a legal-tax relationship requiring the Foundation to pay the ISS (Service Tax);

(ii) The provision results from a preliminary injunction obtained in case No. 0401152-98.2009.8.19.0001 against the State Secretariat of Finance of the State of Rio de Janeiro, suspending the liability of ICMS tax.

On December 31, 2020,the amount of R$202,278 was classified by the Legal Department as being possible outflow of resources. These amounts were not recognized in the Financial Statements for the period, as required by Accounting Pronouncement No. 25 issued by the Brazilian Accounting Pronouncements Committee (CPC).

(In thousands of Reais)

In compliance with NBCTG 25, the following lawsuits are classified as possible loss of suit:

20 Linked projects to be performed (projects in progress)

The Foundation maintains systemic controls over its projects. The balances and records are maintained in a segregated way for each project, considering: projects, goals, items, items of expenses/revenues and bank accounts with specific resource restrictions. 141 out of the 645 projects linked to current accounts, according to Annex I of smaller financial size are grouped into two single bank accounts, aiming not to cause a significant impact on their costs, which represents 2.55% of the total financial resources to be performed. FIOTEC's management intends to complete the work of migrating the balances of these projects to individual bank accounts by the end of 2021.

We present a summary of the movement of resources received by the Foundation, as well as the amounts used in the performance of the projects (consumption).

(In thousands of Reais)

- Summary of Movement

	Balance as of 01/01/2020	Received amounts	Consumption	Resources of completed projects (i)	Balance as of 12/31/2020

23 Compensation of Managers

The Bylaws of the Foundation provides for no compensation for the members of the Foundation's organizations. The Foundation does not distribute portions of equity or income for any reason, and fully applies in the Country the resources destined to the maintenance of its activities.

24 Equity

Owners' Equity is substantially comprised of equity and deficits/surpluses calculated annually.

In 2020, the Foundation's Management decided on the destination and application of the accumulated surpluses in its institutional purposes.

(In thousands of Reais)

As at December 2020 and 2019, the Equity was composed as follows:

	12/31/2020	**12/31/2019**
Fundação para desenvolvimento científico e tecnológico em saúde - FIOTEC	16,098	6,000
PDTI investment fund (i)	5,800	-
HR qualification fund (ii)	1 000	-
Accumulated surplus	4,058	10,098
Total	26,956	16,098

(i) The PDTI Investment Fund was constituted by the board of trustees, originating from the accumulated surplus, with the objective of investing in information technology.

(ii) The HR qualification fund was created by the Board of Trustees, originating from the accumulated surplus, aiming at the qualification of human resources.

25 Tax break

The Foundation is a non-profit entity (exempt from the Payment of Income Tax and Social Contribution referred to in article 15 of Law No. 9,532 of December 10, 1997.

For this, in our judgment, we considered the following taxes and respective rates, levied on revenue (IRPJ and CSSL 34% - cumulative regime - Presumptive Profit).

In compliance with item 27, letter "c" of ITG 2002 (Rl) - non-profit entity, the Foundation gained the amount of R$ 10,033 in the surplus of 2020 as shown in the table below

	12/31/20	12/31/19
Income tax at the rate of 15%	4,437	4,211
Additional of income tax at the rate of 10%	2,934	2,783
Social contribution on profit at the rate of 9%	2,662	2,526
Total Tax Break	10,033	9,520

26 Revenue from contracts and covenants

Revenue from contracts and covenants

The Foundation does not request reimbursement for project management. Our operating revenues are recognized in the income by the withdrawal of the operating cost under contract and calculated on the invoices of services issued by the Foundation, upon the release of the resources contracted by the Projects. In case of projects financed through contracts containing their respective cost worksheets and total value of the financial resources allocated to the performance of the project to cover operating and administrative expenses incurred in the performance of these agreements, covenants and contracts.

In the contracts, regarding project management, there is no requirement to prove the expenses incurred for performance, and there is only a contractual provision for the Operating Cost to be applied for the performance of that subject matter.

Likewise, Interministerial Ordinance 507/2011 provides that in cases of a transfer agreement, that is, contracts involving the transfer of financial resources from the budget, it is possible to receive administrative expenses up to the limit of 15% (fifteen percent) of the subject matter value, provided they are expressly authorized and demonstrated in the respective instrument and work plan.

(In thousands of Reais)

In the case of a covenant, it is about operating cost, where Fiotec proves the expenses related to that subject matter. However, the criteria for demonstrating this amount are established by the contracting part, which hinder the reporting in each covenant.

It should be noted that Law 10,973/94 deals with covenants in the area of innovation, research and development. The covenants executed in the other areas are based exclusively on Law 8,958/94.

The Foundation keeps in specific accounts a record of its revenues earned through the management of contracts and covenants.

27 Overhead expenses

	12.31.2020	12.31.2019
Rental and condominium charges	(201)	(272)
Water and energy consumption	(60)	(87)
Communication services	(290)	(301)
Goods and equipment lease	(388)	(405)
Driving	(110)	(91)
Meal	(99)	(406)
Consumables	(38)	(122)
Vehicles (maintenance and fuel)	(17)	(75)
Travel	(259)	(461)
Maintenance material (i)	(1,563)	(577)
General services (ii)	(4,009)	(839)
Specialized technical services	(2,533)	(3,634)
Information technology services	(3,933)	(3,828)
Tax expenses (iii)	(1,004)	(96)
Total	(14,504)	(11,194)

i. The amount represents, mainly, expenses with the performance of utilities works in the annex of the main building of the Foundation, adaptation of the emergency service unit (UPA - Manguinhos) and acquisition and installation of tents in the EPSJV land.
ii. The amount mainly represents the fine paid to FEDEX TRADE NETWORKS TRANSPORT AND BROKERAGE, INC in the cancellation of the charter flight of FEDEX/X1AQIN
iii. The amount mainly represents the Income Tax paid on the exchange operation of the charter flight of FEDEX TRADE NETWORKS TRANSPORT AND BROKERAGE, INC/XIAQUIN

28 Personnel expenses

	12/31/2020	**12/31/2019**
Salaries, vacation and Christmas bonus	(18,176)	(16,964)
Social charges	(1,695)	(1,366)
Benefits	(6,787)	(5,831)
Other personnel expenses	(155)	(121)
Total	(26,813)	(24,282)

29 Other operating revenues (expenses)

The movement of other net operating revenues (expenses) is comprised as follows:

(In thousands of Reais)

	12.31.2020	12.31.2019
Other operating income		
Reversal of provision **(i)**	-	1,757
Reimbursement of expenses **(ii)**	3,876	39
Funds from projects**(iíí)**	328	1,938
Other revenue **(iv)**	4,380	1,957
Recovery Deposit in court (inss/pis) revenues **(v)**	-	7,661
	8,584	13,352
Other operating expenses		
Return of funds	(36)	(90)
Project adjustment expenses	(47)	-
Credit losses with projects **(vi)**	(5,882)	(1,233)
Glosses of projects **(vii)**	(19)	(350)
Expenses with provisions **(viii)**	(1,350)	(678)
Other expenses	(21)	(6)
Write-off of operating costs**(ix)**	(20)	(448)
Operations with fixed assets **(x)**	(1,330)	(1,335)
Loss on sale of fixed assets		(55)
Donations **(xi)**	(3,392)	(153)
Contributions to projects **(xii)**	(5,853)	(4 196)
Sponsorships and events **(xiii)**	(551)	(850)
Institutional relations **(xiv)**	(7)	(100)
	(18,508)	(9,494)
Other expenses and operating revenue	(9,924)	3,858

i. The amount mainly represents the reversal of provision for labor contingencies considered as a probable loss;

ii. The amount mainly represents the reimbursement for the cancellation of the charter flight of FEDEX/XIAQIN - USD 723.566,20;

iii. The amount is basically represented by the financial remnants converted to the Foundation in the closing of the projects;

iv. The amount mainly represents the amounts received by letter of agreement and terms of cooperation;

v. The amount is represented by the gain obtained in the process of recognition of tax immunity;

vi. The amount is mainly represented by adjustments in completed projects as disclosed in note 9 (iv);

vii. The balance mainly represents the return of resources to FINEP;

viii. The amount basically represents the provision for labor contingencies;

ix. The balance represents the cancellation of administrative operating expenses for the project (DOA);

x. The balance represents depreciation and amortization expenses;

xi. The balance represents donations, as shown in the table below:

Item	12/31/2020	Grantee
44 (forty-four) Counter type cabinet	13	CENTRO DE REFERENCIA PROFESSOR HELIO FRAGA
13 (thirteen) ROTARY CHAIR	12	CENTRO DE REFERENCIA PROFESSOR HELIO FRAGA
01 (one) CONSERVATION CHAMBER CSV 340 AC	15	NATIONAL SCHOOL OF PUBLIC HEALTH
03 (three) KIT GENOTYPE MTBDRPLUSVER2.0 96 TESTS	27	OSWALDO CRUZ FOUNDATION
02 (two) KIT GENOTYPE MTBDRPLUS VER 2.0 96 TESTS	18	OSWALDO CRUZ FOUNDATION

(In thousands of Reais)

200 (two hundred) KIT MEIOOGAWA (CX - 10 TUBES)	25	OSWALDO CRUZ FOUNDATION
02 (two) LAPTOP	21	INST COM UNI C E INFORM CIENTIFICA EM SAÚDE
02 (two) VIDEO CAMERA	34	INST COM UNI C E INFORM CIENTIFICA EM SAÚDE

04 (four) LAPEL MICROPHONE	28	INST COMUNIC E INFORM CIENTIFICA EM SAÚDE
Purchase of furniture from the new Testing Center - Fiocruz - CE	3.043	OSWALDO CRUZ FOUNDATION-CE
Miscellaneous	109	Others
Total	3 392	

xii. The balance is mainly composed of the Foundation's contribution to projects.

xiii. The balance mostly represents expenses with sponsorships, conferences, seminars and the Health Solutions Fair.

xiv. The balance mostly represents expenses with gifts.

30 Financial Result

	12.31.2020	12.31.2019
Discounts obtained	-	35
Exchange variation gain (i)	209	6
Earnings from financial investments (ii)	2,425	3,524
Financial revenue	2,634	3,565
Bank charges	(240)	(242)
Exchange variation loss (i)	-	(8)
Interest for late payment and fines (iii)	(35)	(47)
Interest paid on financing	(6)	(2)
Interest and fees - installment of contractual fine (iv)	(26)	(59)
IOF - Tax on financial transactions	(17)	(7)
Financial expenses	(324)	(365)
Financial Result	2,310	3,200

i. Arising from imports of services, products, machinery and equipment contracted from foreign suppliers;

ii. Financial income calculated based on the effective interest rate disclosed in note 5 (ii);

iii. The balance mainly represents the fine and interest expenses of the INSS;

iv. The amount represents, the interest calculated in the contractual installment, disclosed in note 18;

31 Voluntary work

On December 31, 2020 and 2019, the Foundation received voluntary work from members of the Management, in the exercise of its administrative and financial functions measured in 192 hours in 2020 and 2019, 60 hours of its Directors in 2020 and 60 hours in 2019, which would be equivalent to the total fair value of R$ 804 in 2020 and R$ 774 in 2019.

32 Financial instruments

The Foundation only operates with non-derivative financial instruments that include financial investments and cash and cash equivalents, as well as accounts payable, salaries, vacation and charges, whose values represent the respective market values.

Fair value estimates

The carrying amounts included in the balance sheet, when compared to the values that could be obtained when trading in an active market or, in its absence, with the net present value adjusted based on the current interest rate in the market. During this year the Foundation did not carry out derivative operations.

"Non-derivative" financial instruments

All other "non-derivative" financial assets and liabilities (including assets determined by the fair value through the result) are initially recognized on the trade date at which the Foundation became a party to the contractual provisions of the instrument.

CPC 38 – Financial Instruments: Recognition and measurement establishes a three-level hierarchy for fair value, which prioritizes information when measuring fair value by the Foundation to maximize the use of observable inputs and minimize the use of unobservable inputs.

CPC38 describes the three levels of inputs that should be used in measuring at fair value:

- **Level 1 -** (unadjusted) quoted prices in active markets for identical or passive assets;
- **Level 2 -** Other available inputs, except those in Level **1**, where the (unadjusted) quoted prices are for similar assets and liabilities, in non-active markets, or other available inputs that can be used indirectly (derived from prices);
- **Level 3** – Unavailable inputs due to small or no market activity and that are significant for determining the fair value of assets and liabilities.

The process of measuring the fair value of the Foundation's financial instruments is classified as Level 2.

Due to the characteristics and manner of operation as well as the financial and equity position as of December 31, 2020, the Foundation is subject to the following factors:

Liquidity Risk

Liquidity risk is the risk that the Foundation will encounter difficulties in meeting the obligations associated with its financial liabilities that are settled with cash payments or with another financial asset. The Foundation's approach to liquidity management is to ensure as much as possible that it will always have sufficient liquidity to meet its obligations when due, under normal and stressful conditions without causing unacceptable losses or at risk of undermining the Foundation's reputation.

Market Risk

Market risk is the risk of changes in market prices, such as interest rates on the Foundation's earnings, in the value of their holdings in financial instruments. These fluctuations in prices and fees can cause changes in the Foundation's revenues and costs.

The goal of market risk management is to manage and control exposures to market risks, within acceptable parameters, while optimizing return.

In relation to interest rates, aiming at mitigating this type of risk, the Foundation centralizes its investments in operations with rate of return that accompany the variation of the CDI and fixed income funds.

33 Insurance coverage

The Foundation adopts the policy of taking out insurance coverage for assets subject to risks for amounts considered sufficient to cover occasional losses, considering the nature of its activity.

The risk assumptions adopted, given their nature, are not part of the scope of a special review and, therefore, were not reviewed by the independent auditors.

34 Accommodations, collateral and guarantees

The Foundation did not provide guarantees or participated in any transactions as a guarantor during the years of December 31, 2020 and December 31, 2019.

35 Subsequent events

In times when the rapid and sudden spread of the Coronavirus (Covid-19) pandemic continues to cause the paralization of several productive and commercial sectors, of different branches of activities, in addition to confining people and weakening the world economy, Fiotec has been actively participating in United Against Covid-19 program, launched by FIOCRUZ, which is supported by the public and private spheres, in facing this pandemic.

Although it does not foresee risks and uncertainties about the continuity of its operational activities, it awaits the disclosure of public policies and economic measures that aim to mitigate the impacts resulting from this pandemic on the Brazilian economy and possible impacts on its activities and future results.
